The Human Fertilisation and Embryology Authority guidance states that Centres should provide a costed treatment plan. This plan is an estimate of the costs involved in providing you with sperm donated by a known donor. This does not include any costs involved in your own treatment which will be provided separately. Please note that there may be some variation following any test results and further investigations may be required, at which stage another plan would be discussed with you.

Once you have agreed to this costed treatment plan, payment must be made prior to the investigation/test(s) being undertaken.

1 CONSULTATIONS

Your donor's first consultation at the Centre will last approximately one hour where the process, implications and screening tests required will be discussed and initial screening carried out. He will have the opportunity to ask questions and receive written information.

Once the results of initial screening are available an appointment will be arranged for assessing a semen sample prior to proceeding further.
