

**Prices for treatment undertaken between 1st August 2021 and 31st July 2022**

- Thank you for considering having your fertility treatment with us.
- Before you begin any treatment, a detailed agreed clinical treatment plan must be put in place; this will be done during consultation with one of our fertility specialists.
- Since there is no standard 'one size fits all' treatment plan, costs of all possible components that make up the range of services we offer are detailed below. At your consultation with a fertility specialist, the treatment plan you agree will be made up of some, but not all those components listed below.
- Broadly speaking, costs associated with your treatment can be grouped into the cost of:
  - Consultation(s) with a fertility specialist
  - Investigations
  - Screening tests
  - Medication(s)
  - Treatment(s)
  - Storage of eggs, embryos, or gametes

**Consultation**

Our fertility specialist will prepare for your consultation by reviewing medical records and any tests already undertaken. They will gather remaining information in the appointment and a letter will be sent to you outlining what was discussed and what plan has been put in place. The appointment will not be longer than 30 minutes and may be either face to face or via video link. Any investigations and screening tests required will be discussed with you and arranged thereafter. We may have to ask you to attend a community-based centre for blood tests, this will reduce the number of visits required to the Centre.

Should you wish to commence treatment, you will be sent a link to electronic consents which you can complete in the comfort of your own home. You may be given a further consultation with medical staff followed by a consultation with a member of the nursing team alternatively you may only need a nurse appointment. The nurse appointment costs are included in the price list below.

	Cost	Required
Initial consultation with Fertility Specialist via video link	£225.00	
Initial consultation with Fertility Specialist face to face in Centre	£225.00	
Initial consultation with Fertility Specialist face to face in Centre with diagnostic ultrasound scan	£375.00	
Initial consultation with Fertility Specialist face to face in Centre with diagnostic ultrasound scan and routine semen analysis	£500.00	
Second consultation prior to treatment commencing	£175.00	
Further consultations	£100.00	

A full list of potential investigations is shown below, not all these tests are required by all patients. Relevant tests will be discussed with you prior to requesting them and an invoice will be raised thereafter.

**Investigations**

		Cost	Required
For the Woman	Diagnostic ultrasound scan	£150.00	
	Saline Contrast Hydrosonography/HyCoSy	£350.00	
	Basal FSH	£30.00	
	Anti-Mullerian Hormone Testing	£100.00	
	Karyotype	£350.00	
	Cystic Fibrosis screening	£50.00	
	Trial of Embryo Transfer	£200.00	

All fees must be paid in advance. Treatment fees must be cleared prior to a treatment protocol being prepared. Refunds will be made within 15 working days after cancellation of egg recovery or if no embryos for transfer.

		Cost	Required
For the Man	Semen Analysis	£125.00	
	Sperm Freezing (storage is separate cost)	£250.00	
	Karyotype	£350.00	
	Cystic Fibrosis screening	£50.00	

### Screening Tests

	Cost	Required
BBV screening as required by HFEA	£110.00	
Chlamydia	£25.00	
CMV	£75.00	

### IVF/ICSI treatment cycle

Should your cycle be cancelled before egg recovery you will receive a refund of £1,600

Should your cycle be cancelled after egg recovery but there are no embryos to transfer, you will receive a refund of £1,100.

Should all embryos be frozen due to the risk of hyperstimulation we will proceed with a Frozen Embryo Transfer cycle as soon as possible at no extra cost.

		Cost	Required
IVF <u>or</u> ICSI cycle - All monitoring, egg collection, embryo transfer, AND the freezing of any surplus embryos plus a follow-up appointment	1st Self-Funded IVF/ICSI Cycle in this Centre	£3,756.00	
	2nd Self-Funded IVF/ICSI Cycle in this Centre	£3,356.00	
	3rd Self-Funded IVF/ICSI Cycle in this Centre	£2,956.00	
IVF Cycle – Egg Sharing - All monitoring, egg collection, embryo transfer, follow-up appointment		£2,000.00	
HFEA Charge <u>applies</u> where: <ul style="list-style-type: none"> <li>Eggs and sperm are mixed (even if no embryos develop e.g., failed fertilisation)</li> </ul> HFEA Charge <u>does not</u> apply where: <ul style="list-style-type: none"> <li>Embryos are created but are all frozen (e.g., OHSS)</li> </ul>		£80.00	
Counselling		FOC	

### Medication related to IVF/ICSI cycle above

All medication required for your treatment cycle is prescribed by medical staff involved in your care. Medication is provided when you attend the Centre prior to treatment commencing. For fresh IVF/ICSI cycles, you will receive a 10-day supply, with additional medication provided when and as required, which must be paid when provided. There is no charge for the hCG (trigger medication).

**Please note medication provided for your treatment cannot be returned and therefore costs cannot be refunded.**

		Cost	Required
<b>Down regulation medication</b>			
Buserelin	per vial:	£22.00	
Cetrorelix 7 days of 0.25mgs (£16.50/each)		£115.50	
Fyremadel 7 days (£16.50/each)		£115.50	
<b>Stimulation medication</b>			
10 days of 150 iu's		£374.00	
10 days of 225 iu's		£561.00	
10 days of 300 iu's *		£748.00	

All fees must be paid in advance. Treatment fees must be cleared prior to a treatment protocol being prepared. Refunds will be made within 15 working days after cancellation of egg recovery or if no embryos for transfer.

**Storage costs for sperm, eggs, embryos, or reserved donor sperm:**

The cost for the initial storage period is specified below. Whichever option you chose failure to make further payment once this time expires will result in your sperm, eggs or embryos being allowed to PERISH

	Cost	Required
If less than 3 embryos are being stored there is an option of a one-year fixed fee payable at the time of freezing	£250.00	
Two years at a fixed fee payable at the time of freezing	£500.00	
Five years at a fixed fee payable at the time of freezing	£1,000.00	
Ten years at a fixed fee payable at the time of freezing	£2,000.00	

**Frozen Replacement Cycle (FET)**

If your FET is following a recent fresh cycle, then all information regarding the FET will be discussed with you. A link to relevant information and consent forms will be sent to be read and completed prior to a nurse consultation which is free of charge.

	Cost	Required
All medication required, serum monitoring, embryo transfer and follow-up appointment	£1,400.00	
HFEA Charge (only charged if transfer takes place)	£80.00	
Refund if embryo thawed but no embryo transfer	£500.00	

**Natural treatment cycle**

	Cost	Required
Natural Cycle		
Urine monitoring kit, IUI procedure and follow-up appointment	£750.00	
If cycle cancelled (no IUI) Refund:	£300.00	
HFEA charge for donor treatment only	£37.50	

**Superovulation treatment cycle (SO)**

	Cost	Required
Superovulation Cycle		
All serum monitoring, ultrasound scans, IUI, luteal support and follow-up appointment	£1,108.00	
If cycle cancelled (no IUI) Refund:	£300.00	
HFEA charge for donor treatment only	£37.50	

**Medication related to treatment cycle above**

All medication required for your treatment cycle is prescribed by medical staff involved in your care. Medication is provided when you attend the Centre prior to treatment commencing. For fresh IVF/ICSI cycles, you will receive a 10-day supply, with additional medication provided when and as required, which must be paid when provided. There is no charge for the hCG (trigger medication).

**Please note medication provided for your treatment cannot be returned and therefore costs cannot be refunded.**

	Cost	Required
<b>Stimulation medication</b>		
Each 150 iu's *	£37.40	
Each 225 iu's	£56.10	
Each 300 iu's *	£74.80	

All fees must be paid in advance. Treatment fees must be cleared prior to a treatment protocol being prepared. Refunds will be made within 15 working days after cancellation of egg recovery or if no embryos for transfer.

### Planned Egg Freezing

Should your cycle be cancelled before egg recovery you will receive a refund of £1,600

	Cost	Required
All stimulation monitoring, egg collection, freezing of eggs and follow-up appointment	£2,770.00	

### Medication related to planned egg freezing above

All medication required for your treatment cycle is prescribed by medical staff involved in your care. Medication is provided when you attend the Centre prior to treatment commencing. For fresh IVF/ICSI cycles, you will receive a 10-day supply, with additional medication provided when and as required, which must be paid when provided. There is no charge for the hCG (trigger medication).

Please note medication provided for your treatment cannot be returned and therefore costs cannot be refunded.

	Cost	Required
<b>Down regulation medication</b>		
Buserelin per vial:	£22.00	
Cetrorelix 7 days of 0.25mgs (£16.50/each)	£115.50	
Fyremadel 7 days (£16.50/each)	£115.50	
<b>Stimulation medication</b>		
10 days of 150 iu's	£374.00	
10 days of 225 iu's	£561.00	
10 days of 300 iu's *	£748.00	

### Planned Sperm Freeze

	Cost	Required
Semen Analysis and Sperm Freezing (excluding storage)	£375.00	

### Storage costs for sperm, eggs, embryos, or reserved donor sperm

The cost for the initial storage period is specified below. Whichever option you chose failure to make further payment once this time expires will result in your sperm, eggs or embryos being allowed to PERISH

	Cost	Required
Two years at a fixed fee payable at the time of freezing	£500.00	
Five years at a fixed fee payable at the time of freezing	£1,000.00	
Ten years at a fixed fee payable at the time of freezing	£2,000.00	

### Thawing, Creating and Transfer of Embryos

A consultation will be required before this can be planned, as you may need an ultrasound scan and/or further investigations. These will be discussed with you at your consultation. See information on previous pages.

	Cost	Required
Thawing of eggs, insemination/injection and culture to Blastocyst stage, embryo transfer, follow-up appointment	£1,925.00	
Should there be surplus embryos created see costs above for storage – cost for two years	£500.00	
HFEA fee is payable when cryopreserved eggs are mixed with sperm (even if no embryos develop)	£80.00	

All fees must be paid in advance. Treatment fees must be cleared prior to a treatment protocol being prepared. Refunds will be made within 15 working days after cancellation of egg recovery or if no embryos for transfer.

### Egg Recipient Cycle

	Cost	Required
As per IVF/ICSI cycle plus consultations, investigations, and screening of donor	£4,975.00	
Recipient cycle cost including consultation, screening, medication, and embryo transfer and follow up appointment/pregnancy scan	£1,455.00	
HFEA Charge <u>applies</u> where: <ul style="list-style-type: none"> <li>Eggs and sperm are mixed (even if no embryos develop e.g., failed fertilisation)</li> </ul> HFEA Charge <u>does not</u> apply where: <ul style="list-style-type: none"> <li>Embryos are created but are all frozen (e.g., OHSS)</li> </ul>	£80.00	

### Medication

All medication required for your treatment cycle is prescribed by medical staff involved in your care. Medication is provided when you attend the Centre prior to treatment commencing. For fresh IVF/ICSI cycles, you will receive a 10-day supply, with additional medication provided when and as required, which must be paid when provided. There is no charge for the hCG (trigger medication).

Please note medication provided for your treatment cannot be returned and therefore costs cannot be refunded.

	Cost	Required
Lubion 14 days (£33.60 per pack of 7)	£67.20	
Oestrogen tablets (21-day pack)	£11.00	
<b>Luteal support</b>		
Lubion 14 days (£33.60 per pack of 7)	£67.20	
Progesterone pessaries (£14.35 per pack 15)	£14.35	

### Storage costs for sperm, eggs, embryos, or reserved donor sperm:

The cost for the initial storage period is specified below. Whichever option you chose failure to make further payment once this time expires will result in your sperm, eggs or embryos being allowed to PERISH

	Cost	Required
If less than 3 embryos are being stored there is an option of a one-year fixed fee payable at the time of freezing	£250.00	
Two years at a fixed fee payable at the time of freezing	£500.00	
Five years at a fixed fee payable at the time of freezing	£1,000.00	
Ten years at a fixed fee payable at the time of freezing	£2,000.00	

### Embryo Recipient cycle

Embryos are occasionally donated by couples who do not wish to use them for their own treatment or can be created using an egg donor and either intended parent sperm or donor sperm. The complexity of this treatment and various options needs to be discussed on an individual basis and costed treatment plans will be tailored to your individual requirements. You will have the opportunity to go through each step with a clinician and given time to consider your options before an invoice will be created.

### Sperm Donor Recipient Cycle

You will need to have a consultation and all investigations undertaken as noted above with medical and nursing staff before commencing a treatment cycle. You will also have at least one consultation with our counsellor. The maximum number of cycles we provide is six, thereafter we will offer a consultation to consider your options. Our Andrology staff will help you obtain the most appropriate samples with you for your treatment which you will need to purchase out with the Centre.

All fees must be paid in advance. Treatment fees must be cleared prior to a treatment protocol being prepared. Refunds will be made within 15 working days after cancellation of egg recovery or if no embryos for transfer.

### Known Sperm Donation

**The recipient will be asked to pay for each stage in the known donor process.** Each recipient cycle will be costed as above whether natural insemination, superovulation, or IVF cycle.

	Cost	Required
Initial Consultation	£225.00	
Initial Screening as required as HFEA *	£230.00	
Assessment of a semen sample includes semen analysis, freezing & test thaw	£450.00	

\* Screen as required by HFEA Code of Practice T50 Licence Prior to Processing Eggs, Sperm or Embryo Testing for HIV 1+2, anti-HIV 1+2, Hepatitis B (HBsAg and Anti HBC and Hepatitis C (Anti HCV-Ab) including Syphilis and CMV.

### Full investigations after initial consultation screening

	Cost	Required
Screening: Blood Group and Cystic Fibrosis	£70.00	
Karyotype	£350.00	
Gonorrhoea & Chlamydia urine tests	£35.00	
Additional screening if required	To be advised	

### Laboratory and screening costs for processing and storing each donated sample.

	Cost	Required
Donation each sample	£375.00	

**Quarantine screening: Once sperm has been stored for 180 days the initial screening tests must be repeated before the sperm can be released for use.**

	Cost	Required
Repeat - Quarantine Screening - as note above	£110.00	

### Sibling Samples

	Cost	Required
Purchase of donor sperm for sibling use only	Cost per straw <b>OR</b> If clinically indicated 2 straws required total cost	£300.00

### Storage costs for sperm, eggs, embryos, or reserved donor sperm:

The cost for the initial storage period is specified below. Whichever option you chose failure to make further payment once this time expires will result in your sperm, eggs or embryos being allowed to PERISH

	Cost	Required
Two years at a fixed fee payable at the time of freezing	£500.00	
Five years at a fixed fee payable at the time of freezing	£1,000.00	
Ten years at a fixed fee payable at the time of freezing	£2,000.00	

All fees must be paid in advance. Treatment fees must be cleared prior to a treatment protocol being prepared. Refunds will be made within 15 working days after cancellation of egg recovery or if no embryos for transfer.

### Surrogacy Cycle

At your first consultation a full discussion will take place regarding the full pathway and a plan will be made with you detailing the cost of each step. Please refer to Consultation, Investigation, Screening, Medication and IVF/ICSI costs in previous pages.

**All counselling for surrogate, surrogate partner and couple is free of charge for all having treatment in the Centre with our dedicated counselling staff.**

### Average cost of surrogacy cycle

	Cost	Required
Consultation with medic and nurse commissioning couple and surrogate with partner (2 full consultations plus 2 further)	£450.00	
BBV Screening	£220.00	
Investigations: Ultrasound scan, Semen analysis, AMH, Karyotype,	£725.00	
Medication average cost	£694.00	
Cycle – includes all monitoring, egg collection, embryo culture and transfer plus freezing of any surplus embryos and a follow up appointment	£3756.00	
HFEA Charge	£80.00	
Embryo storage for 2 years	(£500.00)	
<b>Total if no embryos stored</b>	<b>£6275.00</b>	
<i>Total if embryos stored</i>	<i>£6775.00</i>	

All fees must be paid in advance. Treatment fees must be cleared prior to a treatment protocol being prepared. Refunds will be made within 15 working days after cancellation of egg recovery or if no embryos for transfer.
